Fabián Villalta Arburola

Full Stack Developer | Python | React | AI-Assisted Programming
San José, Costa Rica | +506 7226-7911 | fabianvillalta09@gmail.com
fabian-villalta.vercel.app | github.com/Fabito09 | linkedin.com/in/fabián-villalta-arburola

Full stack developer and freelancer with a Technical Diploma in AI-Assisted Programming from Universidad Cenfotec. I build end-to-end web applications with Python (FastAPI, Flask), JavaScript, TypeScript, React and PostgreSQL, and automate repetitive business processes. I work daily with AI coding agents such as Claude Code and Codex, as well as Gemini, reviewing and debugging every change before it reaches production. My experience as a floor supervisor adds team leadership, discipline and the ability to perform under pressure.

EDUCATION

Universidad Cenfotec — San José, Costa Rica
Technical Diploma in AI-Assisted Programming (PIATEC); program completed — *February 2026 – October 2026*

- **Full program completed:** 10 courses, 176 hours, 11 of 11 credits.
- **Technical foundations:** Excel Fundamentals; Python Fundamentals; Advanced Python Programming; Creative Problem Solving.
- **AI-assisted programming:** Introduction to AI-Assisted Programming; Algorithmic Thinking for Prompts; Intentional Programming with Generative AI; Intelligent Process Automation with Generative AI; Code Verification and AI-Assisted Debugging; AI-Assisted Capstone Project.

Secondary Education — Costa Rica
High School Diploma (Bachillerato en Educación Media)

WORK EXPERIENCE

Freelance — Costa Rica
Full Stack Developer — *February 2026 – Present*

- Build end-to-end web applications, from requirements gathering to production deployment.
- Document client workflows to identify repetitive manual tasks and propose automation solutions.
- Design and implement REST APIs with Python (FastAPI and Flask), connected to PostgreSQL and Supabase databases.
- Build user interfaces with JavaScript, TypeScript, React and Next.js; version control with Git and deployment on Vercel and Render.
- Use AI coding agents (Claude Code and Codex) to generate, refactor and debug code, validating every change before production.

Cafetería Kracovia — San José, Costa Rica
Floor Supervisor / Shift Manager — *March 2025 – Present*

- Coordinate on-shift staff and standardize service processes to maintain service times during peak hours.
- Manage and control supply inventory, reducing losses from expired products and stockouts.
- Plan and assign shifts, balancing staff availability against demand by time slot.

PROJECTS

Personal Portfolio — Personal project
End-to-end design and development — *2026*

- Built from scratch with Next.js, React, Tailwind CSS and WebGL animations; live on Vercel: fabian-villalta.vercel.app.
- Responsive interface with custom components: tech stack carousel and animated timeline.

SKILLS

Programming: Python (advanced), JavaScript, TypeScript, SQL
Backend and data: FastAPI, Flask, Node.js, REST APIs, PostgreSQL, Supabase
Frontend: React, Next.js, HTML, CSS, Tailwind CSS
AI: Claude Code and Codex (AI coding agents), Gemini, prompt engineering, debugging AI-generated code
Tools: Git, Vercel, Render, Excel (basic)
Spoken languages: Spanish (native); English (B1, intermediate, actively improving)
Soft skills: Team leadership, effective communication, problem solving under pressure. Interested in process automation and AI agents.
